Operational rules (Annex II)

1. Programme summary
This Annex sets out the operational rules for the programme. The programme agreement is based on the MoU, the concept note and comments made by the NMFA. Commitments, statements and guarantees, explicit as well as implicit, made in the concept note, are binding for the National Focal Point and the Programme Operator unless otherwise explicitly stipulated in the annexes to this programme agreement.

The Programme Operator is the Ministry of Environmental Protection and Regional Development of the Republic of Latvia (MEPRD). The Donor Programme Partner is the Norwegian Environment Agency (NEA).

The programme covers programme area 11 'Environment and Ecosystems' and 13 'Climate Change Mitigation and Adaptation' with PA 13 as the host programme area. It has a total allocation of €14,000,000 from the NO FM. Including national co-financing, the total programme eligible expenditure is €16,470,588.

The main objective of the programme is to mitigate climate change and reduce the vulnerability to climate change. The programme consists of three outcomes.

- Outcome 1 'Improved climate change policy developed and implemented at all levels'. The outcome has an allocation of €2,182,278 and will be implemented by way of a pre-defined project (PDP-1).
- Outcome 2 'National soil data for climate change policy planning updated' has an allocation of €1,835,369. The outcome will be implemented by way of a pre-defined project (PDP-2).
- Outcome 3 'Reduced risk of pollution from polluted sites' is dedicated to an open call for proposals on remediation of polluted sites. The call has an allocation of €1,000,000.

2. Eligibility
2.1 Eligible applicants:
The rules on eligibility of project promoters and project partners are set in Article 7.2 of the Regulation. In accordance with Article 7.2.4 of the Regulation, the following entities shall be eligible as project promoters within the call for proposals:

- state and local government institutions:

4.2 Selection procedures:

The project evaluation and award of grants shall be in accordance with Article 7.4 of the Regulation.

The Programme Operator shall be responsible for project evaluation, selection and the award of grants.

The Programme Operator shall review the applications for compliance with administrative and eligibility criteria. Applicants whose applications are rejected at this stage shall be informed and given a reasonable time to appeal that decision.

Each application that meets the administrative and eligibility criteria shall be reviewed by at least two independent experts appointed by the Programme Operator. The experts shall separately score the project according to the selection criteria published with the call for proposals. For the purposes of ranking the projects, the average of the scores awarded by the experts shall be used. If the difference between the scores given by the two experts is more than 30% of the higher score, a third expert, shall be commissioned by the Programme Operator to score the project independently. In such cases, the average score of the two closest scores shall be used for the ranking of the projects.

The Programme Operator shall establish a Selection Committee. The Selection Committee shall be chaired by the Programme Operator and consist of three voting members, including the chairperson. At least one of the voting members in the Selection Committee will be an expert on remediation projects. The Donor Programme Partner shall be involved in the Selection Committee as a non-voting member.

The National Focal Point and the NMFA shall be invited to participate in the Selection Committee meetings as observers.

The Programme Operator shall provide the Selection Committee with a list of the ranked projects. The Selection Committee shall review the ranked lists of projects. The decision of the Selection Committee shall be taken by consensus of all voting members. The Selection Committee may modify the ranking of the project applications in justified cases based on transparent criteria, in such cases the detailed justification will be included in the minutes of the meeting.

The Selection Committee shall prepare a list of projects recommended for support or to be approved with conditions. The Programme Operator, based on the recommendation of the Selection Committee, shall make the decision on which projects shall be supported. The Programme Operator may modify
the decision of the Selection Committee in justified cases. The decision will be documented, in particular, if the decision does not fully reflect the recommendations of the Selection Committee.

4.3 **Project grant rate:**
Grants from the programme may be up to 85% of total eligible expenditure of the project. The grant rates for the pre-defined projects are set in section 5.1. The project grant rate shall in all cases be set at a level that complies with the State Aid rules in force and takes into account any and all other forms of public support granted to projects. Any remaining costs of the project shall be provided or obtained by the project promoter.

5. **Additional mechanisms within the Programme**

5.1 **Pre-defined projects**
There will be two pre-defined projects implemented under the programme:

Programme outcome the project contributes to: 'Improved climate change policy developed and implemented at all levels'

The project combines capacity building on climate change in relevant state institutions with development of specific methodologies and proposals for legislation on climate change. The aim of both sets of activities is to ensure enhanced implementation of climate change policies at regional/local level and in particular sectors.

The pre-defined project will include, *inter alia*, the following activities:

- Development of additional climate change policy planning tools, including:
  - Framework for collection and provision of regional data to supply regional climate change policy planning and implementation;
  - Electronic database on ozone depleting substances and F-gases;
  - Updated Latvia's climate change scenarios for 2100;
  - Enhancement of national warning system regarding meteorological phenomena;
  - Updated national coastal erosion assessment considering climate change scenarios.

- Integration of climate change policy into sectoral and regional policies and activities:
  - Assessment of current practices and development of recommendations to integrate climate change mitigation and adaptation aspects into policies of sectors such as financial activities, insurance, construction of buildings, roads and railroads, land use planning/re-planning;
  - Development and implementation of study course for municipalities and cities on climate change mitigation and adaptation.

The programme agreement shall be amended following the submission of the detailed description and budget for this project to the NMFA.

2) "Enhancement of sustainable soil resource management in agriculture"
Project Promoter: Ministry of Agriculture of the Republic of Latvia
Donor project partner(s): Norwegian Institute of Bioeconomy Research (NIBIO)
Other project partner(s): University of Latvia
State Plant Protection Service
State Forest Research Institute (SILAVA)

Total maximum eligible costs: € 1,835,369
Project grant rate: 100.00 %
Maximum project grant amount: € 1,835,369

Programme outcome the project contributes to: 'National soil data for climate change policy planning updated'

The project aims to improve national soil data for the development and implementation of climate change policy. Currently it is not possible to provide qualitative soil information to various stakeholders. Lack of comprehensive and updated soil information complicates adoption of sustainable resource management decisions, especially in land management planning.

The pre-defined project will include, *inter alia*, the following activities:

- Improvement of reliable, country-specific soil information in agricultural land:
  - Update of historical soil database;
  - Development of national soil classification system;
  - Development of soil mapping methodology;
  - Mapping of peat soil distribution;
- Establishment of national soil carbon monitoring system;
- Improvement of national GHG emission calculation system.
