<sup>1</sup> Operational capacity - shows whether directly supported SMEs can increase (scale-up) their ability for higher results (as introduction of new products or services, improved process of production or delivering products or services, etc.) in their businesses. The indicator will be measured by pre-defined project promoters (planning regions) a year after certain activity (measure) is implemented. Pre-defined Project Promoters will conduct a survey of all SMEs which have participated in project activities to find out if SMEs have introduced new products or services, or SMEs have improved process of production or delivering products or services etc.
